Abstract: We report the effects of Tokishigyakukagoshuyushoukyoto on 124 patients who visited our orthopaedic service. Some of their symptoms were aggravated when the patients felt cold, while other symptoms were improved when the patients were warmed. There were also some patients with poor blood circulation. The medicine was effective for 42% of 124 cases, which is consisted with very effective for 21% and mildly effective for 21%, and slightly effective for 42%.

Key words: Tokishigyakukagoshuyushokyo, the cold, orthopaedic fields
