

症 例 報 告

桂枝加竜骨牡蛎湯が著効した外傷性頸部症候群の1例

普天間朝拓*

要旨：整形外科医にとって、外傷性頸部症候群は治療抵抗性であることが多い。外傷そのものによる痛みを、事故処理、相手方の対応や賠償問題など精神的なストレスなどが増強していると思われるケースでよく経験する。患者の訴えを傾聴し、精神的ストレスを緩和する必要があるが、そのような症例に対し漢方医療は大変有用と考える。

索引用語：外傷性頸部症候群，桂枝加竜骨牡蛎湯

PAIN AND KAMPO MEDICINE Vol.18 (2008)

A Case of Injury-related cervical injury (Whiplash injury) treated with Keishikaryukotsuboreito

Chotaku Futenma *

Abstract: For an orthopedist, Injury related Cervical Injury is sometimes very difficult to treat.

Many cases are refractory to conventional treatment: NSAIDS, Tranquilizers, trigger point injection etc. Generally speaking, the pain is deeply associated with mental condition.

In case, KAMPO medicine can treat effectively both physical pain and mental stress. I report effect of Keishiryukotsukaboreitou for Injury-related cervical injury.

Key words: Injury-related cervical injury (Whiplash injury), Keishiryukotsukaboreito
