

症 例 報 告

鎮痛補助薬抵抗性の口腔顔面痛の高齢女性に対して
漢方エキス薬が著効した2症例山田 恵子^{*1,*2,*3} 高雄由美子^{*1} 柳本富士雄^{*1} 佐藤仁昭^{*1}
首藤達哉^{*4} 青木基夫^{*5} 蔭山 充^{*6}

要旨：鎮痛補助薬抵抗性の口腔顔面痛の高齢女性に対して漢方エキス薬が著効した2症例を経験した。症例1は76歳女性。Ramsay Hunt 症候群による口腔内、舌全体、右耳後部の痛みに対し、雨天前に痛みが増悪するという訴えを水毒と捉えて、五苓散 (TJ-17) 7.5g, 分3/日投与すると痛みが軽減した。さらに瘀血も認めため桂枝茯苓丸 (TJ-25) 7.5g, 分3/日を追加投与すると痛みは著しく軽減した。症例2は74歳女性。三叉神経痛様発作痛と持続痛が混在する口腔顔面痛。カルバマゼピン内服は無効であった。症例1と同様、雨天前に痛みが増悪するため五苓散 (TJ-17) 7.5g, 分3/日投与開始すると痛みが軽減した。また、喉の詰まりを咽中炙癰 (梅核気) と考え、気滞と捉え、半夏厚朴湯 (TJ-16) 7.5g, 分3/日投与を追加したところ著効した。

索引用語：口腔顔面痛、鎮痛補助薬抵抗性、五苓散、桂枝茯苓丸、半夏厚朴湯

PAIN AND KAMPO MEDICINE Vol.23 (2013)

Two cases of intractable orofacial pain those resist the supplementary analgesic
successfully treated with Kampo medicineKeiko YAMADA^{*1,*2,*3}, Yumiko TAKAO^{*1}, Fujio YANAMOTO^{*1}, Hitoaki SATO^{*1},

Abstract: We reported two cases of intractable orofacial pain. They showed the resistance for the supplementary analgesic but are highly effective on the treatment with Kampo medicine.

Seventy six-year-old female had the pain derived from Ramsay Hunt syndrome in the oral cavity, on the tongue and on the back of right ear. The treatment with pregabalin reduced the pain by 20%, but she still complained of pain. Because her pain got worse before the raining, goreisan (TJ-17) 7.5g/day was prescribed. It is a medicine for 'Suidoku', the disorder of the body's fluid metabolism. After that her pain was improved, and then keishibukuryogan (TJ-25) 7.5g/day was added to treat 'Oketsu syndrome', blood stagnation, to achieve an effect furthermore, and her pain was reduced remarkably.

Seventy four-year-old female has the atypical facial pain. Pain attack likes trifacial neuralgia and persistent facial pain were mixed. Carbamazepine was not effective. Her pain got worse before the raining. TJ-17 7.5g/day was prescribed, and her pain was reduced. After that, she felt something stacking in her throat. Therefore, 'Ki-tai', stagnation of vital energy, was diagnosed, and hangekobokutou (TJ-16) 7.5/day was added. Her symptoms were improved remarkably.

Key words: resistance for the supplementary analgesic, intractical atypical facial pain, goreisan, keishibukuryogan, hangekobokuto
