症例報告

統合医療で完治できた若年の 複合性局所疼痛症候群(CRPS)の1症例

緒方政則*

要旨: 西洋薬と並行して電気鍼治療, 漢方薬, リハビリを行う統合医療で完治した若年の複合性局所疼痛症候群 (CRPS) 症例を経験した. 症例は14歳男性で, 左踵骨骨折でギブス固定した後, 痛みが残存し, 次第に触れない痛みが出現した. 6ヵ月後, 患側の腫脹・疼痛, 温度知覚左右差, アロデニアの所見から, CRPS の診断で受けた. 症状改善しないため, 7ヵ月後に当院入院となった. 漢方薬 (柴胡加竜骨牡蠣湯, 六君子湯後に四逆散, 疎経活血湯に転方), 電気鍼治療で除痛したあと, リハビリテーションを行い, 約2週間で改善し, 完治することができた. 現在まで, 再発を認めていない. 早期の電気鍼治療による除痛と統合的治療の組み合わせが若年 CRPS に対して重要である.

PAIN AND KAMPO MEDICINE Vol.23 (2013)

A case report of juvenile complex regional pain syndrome (CRPS) treated successfully treated with the integrated therapy using electric acupuncture, kampo medicines and rehabilitation

Masanori Ogata*

Abstract: This is a case report of 14 year male patient suffering from complex regional pain syndrome (CRPS) with untouchable persistent left heel pain for seven months after fracture of the os calcis. The combination of electric acupuncture, kampo medicines (saikokaryukotsuboreito, rikkunshito, shigyakusan, sokeikakketsuto) and rehabilitation caused the recovery from severe pain and gait disturbance two weeks after the treatment. The patient acts normal social activities without pain at present. It was suggested that the multiple medical care with the electric acupuncture, kampo medicines, rehabilitation and exercise was effective for the reduction of pain in patients with juvenile complex regional pain syndrome (CRPS).

Key words: Complex regional pain syndrome (CRPS), Electric acupuncture, saikokaryukotsuboreito, shigyakusan, sokeikakketsuto
