PAIN AND KAMPO MEDICINE Vol.23 [2013]

Treatment of multi-complaint patients using kamishoyosan

Chotaku Futenma *

Abstract: Three post-menopausal patients who had various physical and psychological symptoms were treated with kamishoyosan (TJ-24).

Among many symptoms, anxiety and insomnia were complained by all cases.

Kamishoyosan (TJ-24) improved all symptoms and all patients were able to come back in ordinary life.

Kamishoyosan (TJ-24) might be effective in patients with post-menopausal multicomplaint patients.

Key words: kamishoyosan (TJ-24), multicomplaint patients, anxiety
