漢方 3 剤併用により症状改善を認めた
術後三叉神経痛／口内炎の 1 症例

黒川 修二*

要旨：口腔顔面領域の痛みは様々な原因があり、患者にとっては不快なものである。治療としては抗痙攣薬、抗うつ薬等の薬物療法、神経ブロック、心理療法等の西洋医学的治療が中心となるが、難渋するときもしばしばある。本症例は西洋医学的な薬物療法で治療に難渋していたが、立効散、抑肝散、半夏瀉心湯を病態に応じて順に併用していき、症状の改善を認めた。西洋医学的治療に難渋する場合は漢方療法を試みてもよい。

索引用語：3 剤併用、抑肝散、立効散、半夏瀉心湯、術後三叉神経痛

PAIN AND KAMPO MEDICINE Vol.31 (2022)

A case of refractory orofacial pain effectively treated with a combination of three Kampo medicines
Shuji KUROKAWA *

Abstract: Pain in the orofacial region has various causes and is uncomfortable for patients. Western medical treatments such as anticonvulsants, antidepressants, nerve blocks, and psychotherapy are the mainstay of treatment, but they are often ineffective.

In this case, it was difficult to treat with Western medical therapy, but the symptoms improved when the combination of rikkosan, yokukansan, and hangeshashinto were used in order according to the condition.

For intractable pain for which Western medical treatment is ineffective, treatment with Kampo medicine should be attempted.

Key words: 3 agents, yokukansan, rikkosan, hangeshashinto, Kampo medicine
